# The DuMor Difference

**THE EXPERIENCE** Since 1984, DuMor has focused on combining the best products, people and Representatives to deliver a superior customer experience. Our people, manufacturing the finest products, are represented by teams of talented, dedicated individuals across the U.S. and Canada who deliver the DuMor customer experience on a local level. Company and Representative dedication to customer service has always been at the forefront of our business model. From your initial discussion with a DuMor Representative, through the specifying and manufacturing processes to final product delivery, we are driven to provide an exceptional customer experience.

**THE QUALITY** A cornerstone in the original DuMor vision was to design and manufacture outdoor furniture of exceptional quality. We are known throughout the industry as a brand that exemplifies the value of well built, superior quality products. Based in central Pennsylvania, DuMor is proud of our dedicated craftsmen who build each product with precision. Established and trusting relationships with quality vendors ensure we source the best raw materials for use in manufacturing. Efficient, quality focused manufacturing processes coupled with our people and materials enable DuMor to set the standard for quality in the site furnishing industry.

**THE VERSATILITY** Certain unique spaces demand a product with a perfect fit. At DuMor, we meet that challenge by working with Architects and Project Planners to bring custom product ideas to life. We have a dedicated team of designers and draftsmen who specialize in making custom products a reality in a timely manner. Additionally, changes to standard products such as additional armrests, custom color matching, unique bench length and laser cut designs are no problem. We bring to the table decades of experience making site furnishings that turn your vision into reality.

**THE DESIGN** Good Design Matters. Ingrained in our culture is a desire to consistently introduce new and relevant products for our customers. Relevant means we aspire to have a product line as extensive and diverse as the projects that Landscape Architects and Planners design. Our goal is to design site furnishings that fit any space whether matching a contemporary space, accentuating traditional architecture, or blending into the nature of a park. The DuMor product line lives through the weather and industry trends, because good design is timeless.

**WHY WE DO WHAT WE DO** We believe great outdoor spaces make the world better. We think communities flourish when they have public space to enjoy. We think commercial spaces should include functional site amenities. We want to make spaces more comfortable, accessible to everyone, functional and more beautiful. It's a simple thing that drives us. We love what we do!

# COLOR AND MATERIAL OPTIONS

## POWDER COAT COLOR OPTIONS

Most DuMor products are available in your choice of several color options in a super durable baked-on polyester powder finish.

Additional RAL colors are available at an extra cost—consult your local DuMor representative.

## WOOD

**IPE**

**DOUGLAS FIR**

DuMor has selected the highest grade woods available for use on our products. "C" & Better Douglas Fir and Ipe are offered as standard wood options. Douglas Fir will be delivered coated in a clear preservative. Due to its density and estimated longevity left uncoated, Ipe will be delivered in its natural state without preservative.

As a natural product of our environment, wood will weather when placed outdoors. Signs of weathering include splitting, checking, and changing color. These are not covered by DuMor's warranty. Wood colors will vary.

## RECYCLED PLASTIC

**WALNUT**

**CEDAR**

**GREY**

**REDWOOD**

The high-density polyethylene raw material utilized in our recycled plastic furnishings is derived from post-consumer bottle waste resulting in a product that is over 90% recycled.

## WOOD GRAIN RECYCLED PLASTIC

**BRAZILLIAN WALNUT**

**ANTIQUE MAHOGANY**

The longevity and Eco-friendliness of recycled plastic lumber with a feel and depth reminiscent of wood. Wood grain recycled plastic is extruded with a multicolor tonal streaking and etched with a wood grain texture to achieve a realistic wood like appearance and feel. To truly appreciate this product it needs to be seen and handled, ask your rep for a free sample. Plastic lumber is comprised of 95% recycled content. Only available on select products.

Please note that due to variations in photographic reproductions, natural wood grains and colors shown throughout may not be exact. Please contact your local DuMor representative for color and wood grain samples.

## SPLIT STREAM RECYCLING

### 40-RC Split Liners and Recycle Lid

The "40-RC" denotation on the end of certain product numbers indicates the receptacle has two 20 gal. semicircle liners and a split material lid (as shown right).

- The following receptacles can be purchased new with this option: 41/43, 84, 89, 102, 107, 148, 157, 158, 170, 200/300, and 432.
- A split stream recycling retrofit kit can also be purchased for most existing DuMor units, see page 73.
- Recycling specific receptacles found on pp. 69-70.

*\*Vinyl lettering shown on recycling covers above is not available on any textured powder coat finishes.*

## RECEPTACLE 84

**84-22** 22-gal. All-Steel Receptacle, 139 lbs.

**84-32** 32-gal. All-Steel Receptacle, 186 lbs.

- Polyethylene cover
- Ash urn top

## PERSONALIZED RECEPTACLE 200/300

The “200” and “300” series receptacles allow custom laser cut designs to be emblazoned onto the side of the receptacle. These receptacles are an excellent way to showcase the name of a city or town, corporate logo, school name/logo, or your own unique design. Receiving a custom design is easy, simply provide a drawing of your idea and we will be happy to create a one-of-a-kind receptacle drawing for your approval. Note, all custom designs are subject to our approval. The 200 series receptacle is top emptying and the 300 series receptacle is a side door emptying receptacle.

EXAMPLES

HIGH SCHOOL NAME & LOGO

CITY PARK & LOGO

CITY NAME & LOGO

**200 Series** 32-gallon Personalized Receptacle with steel shield, 149 lbs.

**300 Series** 32-gallon Personalized Receptacle with steel shield, 149 lbs.

Additional Cover Options

Note: Available with 40 RC split liners and recycle lid. Contact your local DuMor representative for pricing

## GRILL 21 & 22

21-00 For embedment, 86 lbs.

22-00 Freestanding, 107 lbs.

Item 22-00 Freestanding

## GRILL 24

24-00 For embedment, 242 lbs.

Shown in Black

## BOLLARD 400

**400-36** 36" high 4" Schedule 40 Steel Bollard, 65 lbs.

**400-42** 42" high 4" Schedule 40 Steel Bollard, 71 lbs.

**Support Options:** S-1, S-2, and S-1SL\*

\* For Bollards with support option S-1SL (ground sleeve supplied w/cap), add to unit price and 43 lbs. to weight.

Shown in Green

## BOLLARD 401

**401-36** 36" high Bike Bollard-2 loops, 76 lbs.

**401-42** 42" high Bike Bollard-2 loops, 81 lbs.

**Support Options:** S-1, S-2, and S-1SL\*

\* For Bollards with support option S-1SL (ground sleeve supplied w/cap), add to unit price and 43 lbs. to weight.

Shown in Argento

## BOLLARD 402

**402-36** 36" high 6" Square Steel Bollard, 114 lbs.

**402-42** 42" high 6" Square Steel Bollard, 124 lbs.

**Support Options:** S-1, S-2, and S-1SL\*

\* For Bollards with support option S-1SL (ground sleeve supplied w/cap), add to unit price and 43 lbs. to weight.

Shown in Black

## BOLLARD 451

**451-36** 36" high Round Bollard, 139 lbs.

**451-42** 42" high Round Bollard, 149 lbs.

**Support Options:** S-1, S-2, and S-1X Secure w/8" pipe\*

\* For Bollards with support option S-1X add

to unit price and 154 lbs. to weight.

# DUMOR CUSTOM PRODUCTS

In addition to our comprehensive selection of standard products, DuMor provides custom design and fabrication options to meet the needs of designers and architects whose requirements aren't always met by off-the-shelf site furnishings. Choose from a variety of high-quality raw materials including wood, steel, and recycled plastic, or customize with plaques and lettering options. DuMor's design flexibility makes creating a custom indoor or outdoor space easy and affordable. You'll see that DuMor's reputation for style and durability is reflected in every custom product. For more information on custom fabrication, please contact your local authorized DuMor representative or call 800-598-4018.

# DUMOR CUSTOM PRODUCTS

## CUSTOM CURVED BENCHES

With decades of experience creating site specific curved and continuous benches, DuMor's custom product department can design benches to virtually any radius your space requires. Contact a DuMor Representative with your bench preference and dimensions and we will design a custom bench for your approval.

# CUSTOM PLAQUES

An attractive and enduring way to show sponsorship of a DuMor bench is with a dedication plaque. DuMor plaques are made of durable etched zinc with a bronze style finish. Zinc plaques are long lasting and offer versatility for etching detailed designs, crisp text, illustrations and photo transfers. DuMor offers plaques in a wide range of sizes and shapes to meet specific needs. Most DuMor products can be fitted to display a dedication plaque; ask a DuMor representative if your chosen product can accommodate a plaque to fit your specifications. Dedication plaques can be used in many ways including, remembrance of a loved one, company logo, town or city name, quotes, sports teams, school name or family name. Given the versatility of DuMor dedication plaques on site furniture, many communities have had great success fully funding both benches and plaques with “Sponsor a Bench” programs which allow people to contribute to the community and place a message on a plaque.

*Black and white camera-ready artwork is required for logos or special graphics. (Note: All requests are subject to our review and approval.)*

\*DuMor mounts plaques so they are flush with seating surfaces

# SUSTAINABILITY COMMITMENT

---

## ► Our Commitment to Sustainability

DuMor recognizes the importance of using recycled material in our entire product line. This reduces solid waste volumes in landfills, helps conserve natural resources and limits the environmental impacts resulting from the extraction of virgin materials.

## ► Pre- and Post-consumer Recycled Content

We utilize pre- and post-consumer recycled material in all of our products. Pre-consumer material is material diverted from the waste stream during the manufacturing process. Post-consumer material contains waste material generated by households or by commercial, industrial and institutional facilities in their role as end-users of the product, which can no longer be used for its intended purpose. Used milk jugs and old railroad tracks are examples of post-consumer materials used in our products. Please contact your local DuMor representative for details on the pre- and post-consumer recycled content of our products.

## ► Eco-friendly Material Composition

Our product line is composed of three primary materials: steel, recycled plastic and sustainably-harvested wood, all of which possess eco-friendly attributes.

**Steel-** The majority of steel in our products contains over 80 percent recycled material, most of which is post-consumer. Our primary supplier of steel utilizes the Electric Arc Furnace (EAF) technology, which takes advantage of post-consumer scrap material for major feedstock, unlike blast furnace operations which use mined iron ore as major feedstock.

**Recycled Plastic-** Many of our products feature the PolyTuf Plastic Lumber product. PolyTuf is manufactured using 100% recycled milk jugs (post-consumer high density polyethylene). We also donate our scrap plastic to the manufacturing of new PolyTuf product, further reducing waste stream volumes.

**Sustainably-Harvested Wood-** We make it a priority to purchase only sustainably-harvested wood derived from stringently-regulated timber source locations, including: California, Oregon, Washington and British Columbia.

## ► Compatibility with LEED® Rating System

Leadership for Energy and Environmental Design (LEED) is the world's most well-recognized and sought-after green building rating system, created and administered by the United States Green Building Council (USGBC). Achieving LEED certification is contingent upon earning credits, which provide guidelines for the design and construction of high performance, durable, healthful, affordable and environmentally-sound buildings. Many of our products could help design teams earn LEED credits. Please contact your local representative to learn more about how DuMor's products can help your project achieve LEED certification.

\*Please contact your local DuMor representative for more details on the eco-friendly attributes of our product line.

## MAINTENANCE & CLEANING

The following guidelines can be followed to provide general maintenance and cleaning for DuMor Site Furnishings.

As with any product used in a commercial application, a regular inspection of the product should be conducted. Any loose or missing hardware should be tightened or replaced immediately. If any part of the item is found to show excessive wear or is cracked or broken, the product should be taken out of service until all repairs are made.

All wood components should be inspected for excessive cracks or splits and repaired or replaced as needed. The surface of wood components should be checked for splinters and sanded as required. Discoloration of wood can be treated using a 50/50 mixture of household bleach and water. Mix the solution in a plastic bucket only. Using rubber gloves and a mild bristle brush, apply the mixture and lightly scrub leaving the mixture on the wood for 3 to 4 minutes. Rinse with clean water. Allow the wood to dry. Recoat Douglas Fir with a clear non-toxic, oil-based or water-based preservative. (Ipe has its own natural defenses—it does not need preservative.) If the household bleach solution does not remove the discoloration, it may be caused by a chemical stain (such as iron stain). A saturated solution of oxalic acid (wood bleach) in water will work on such a stain.

All recycled plastic components offered by DuMor are molded 100% polyethylene. For general surface cleaning, scrub the recycled plastic with a plastic bristle brush and a cleaning product such as CLR® or Simple Green®. Rinse with clean water. If the surface has been marked with graffiti, a pressure washer may be used to remove the graffiti. (Power wash boards at a minimum of 12" away with 1,500 PSI.) Severe scratches and carvings into the surface may be hand sanded with a fine grade of sandpaper to remove any sharp edges.

All steel components have been finished with a baked-on polyester powder coating which offers long-lasting protection against acids, salts, and corrosive moisture. Surface cleaning should start when the product is installed, ensuring that construction materials are removed. The frequency of cleaning depends in part on the standard of appearance that is required and also on the need to remove deposits that could cause damage. In harsher environments (such as industrial or marine or those involving pollution or salt spray), more frequent cleaning may be required. All surfaces should be cleaned using warm water, a non-abrasive cleaner such as Simple Green®, and a soft cloth or sponge or a soft bristle brush. If, however, the finish is abraded to the point of exposing the steel or is similarly rusted, lightly sand the surface being careful to remove all rust as well as any loose finish materials. Once this sanding is complete, clean the surface with a solvent such as paint thinner to remove any remaining contaminants which might hinder proper paint adhesion. A zinc primer and top coat of matching color enamel should then be applied over the prepared surface.

All plaques should be cleaned using water, household dish detergent, and a clean cotton cloth. Soft sponges may be used to get into tight corners and small spaces. No brushes or other abrasive materials should ever be used on plaques.

### CHARACTERISTICS OF IPE

As an organic product, the color of Ipe can vary from board to board. Unlike plastic or paint where color matching can be controlled, the color of an Ipe board can be dependent on climate, time of harvest, how it was cut and dried, when it was milled and how long it was stored. Ipe wood is quite dense, and as such, is extremely resistant to preservative treatment. Left to nature, the UV sun rays and traditional weathering will change the Ipe to an attractive, consistent light gray. Therefore, Ipe leaving the DuMor facility will not be coated with a preservative. During the graying process as Ipe wood ages, it has a tendency to check as moisture leaves the board. Once the board reaches a stable moisture level, the check will close some as the width of the board shrinks. This has been described as a dynamic process of shrinking where checks appear but dramatically lessen with time. Left uncoated to weather, the US Department of Agriculture and Forestry rates Ipe as "Very resistant to attack by decay, fungi and termites." The USFPL (United States Forest Products Lab) classified Ipe as "Very Durable" (their highest rating). Although we recommend allowing IPE wood to undergo the natural weathering process, should you wish to somewhat maintain the original color, regular maintenance and preservative are required.

## NUMERICAL INDEX

### TERMS AND CONDITIONS

**Prices are F.O.B. Mifflintown, PA, and are subject to change without notice.**

Terms are net 30 days from date of invoice to those customers with approved credit. All others, check with order. Freight charges are as determined and collected by the carrier unless DuMor is instructed to prepay and add to the invoice for the merchandise. All products manufactured by DuMor are warranted against defect in materials and/or workmanship and in accordance with our published specifications. In addition to a standard one-year warranty on all products, DuMor also offers a limited 20-year warranty against structural failure of all steel bench frames, steel bench assemblies, table frames, litter receptacle frames, and all cast iron bench supports; limited 5-year warranty against structural failure of Douglas Fir, Redwood, and Ipe wood slats; a limited 10-year warranty against structural failure of recycled plastic; and a limited 3-year warranty on bike racks. These warranties cover only those items which have been installed according to our detailed instructions and do not cover abnormal use or vandalism. Contact your local DuMor representative for details of the extended warranty program. DuMor is not responsible for loss or damage of products in transit. Any shortages or damage should be noted on the freight bill before signing. In the interest of product improvement, DuMor reserves the right to alter product design, material selection, or construction without notice.
