Playground
 OF DISTINCTION

The Playcraft Systems Playground of Distinction Program is a non-competitive awards program that seeks to recognize innovative play space design within a community. Playgrounds of Distinction show a dedication to vibrant communities through a rigorous community engagement, design response, and active play space implementation in the following categories:

- **DYNAMIC**
- **INCLUSIVE**
- **IMAGINATIVE**
- **INTERGENERATIONAL**

ENVIRONMENTAL STEWARDSHIP

Living and playing within Oregon's forests and landscapes has inspired our unwavering appreciation for the environment. We firmly believe that Playcraft's stewardship of our surroundings is a reflection of ourselves and the responsibility we embrace to protect the lands we share. Playcraft Systems® is committed to creating the best playground equipment available for the health of our children, our communities, and our environments.

OBJECTIVES

HARMONY WITH NATURE

Playcraft Systems is respectfully aware of our positive impact on the world around us, not only through the play areas we create, but also our advocacy of ecological conservation and restoration of community resources. We ensure our contribution to mankind's future is greater than the footprint we leave behind.

VALUE NATURAL RESOURCES

The value of clean air, fresh water, and healthy wildlife cannot be overstated. Playcraft is resolute in the pursuit of improving resource conservation through efficient design and operational waste reduction.

REDUCE FOOTPRINT

We are committed to minimizing the primary and secondary sources of greenhouse gas emissions throughout the product life cycle. This is achieved through collaboration with our consultants and clients. By utilizing recycled materials, resourceful energy and waste manufacturing techniques, and more fuel-efficient shipping methods we can reduce overall emissions

STRATEGIES

COMMUNICATION

We promote the education and advocacy of sustainable practices through our distribution and consultation network. Highlighting environmental considerations such as our product durability, the longevity of our product's life cycle, and the recycled content used throughout our variety of products.

MANAGEMENT SYSTEM

Playcraft products go through an in-house manufacturing process and are American made. Our PDCA cycle ensures continual improvement of how parts are designed, energy efficiency of machinery used, and waste recycled without sacrificing safety or durability.

COMMUNITY ACTIVITY

We educate and promote our company culture to be Champions of Change within our interconnected communities. Activities like our "Days of Caring", certification programs, customer incentives, and sustainable construction practices help encourage our vast network to support these efforts.

CRAFTSMANSHIP

“Quality is never an accident, it is always the result of intelligent effort”

In today's mass produced world, the commitment to craftsmanship can fall by the wayside. Dedication and an unyielding determination are essential to creating a superior product. At Playcraft Systems, craftsmanship is the cornerstone of our company. Building on a foundation of sustainable materials, innovative design and our state-of-art manufacturing techniques, we create playground equipment and playscape experiences unmatched in the industry.

Play is what brings communities together. It nurtures the bond between a parent and child and friendships between children. Playgrounds bring out everyone's imagination and a sense of wonder. They provide a place without limitations to our creativity. Playcraft Systems ensures today's generation of children will not only enjoy the element of play, but will one day bring their own children to that same playground and relive what it means to be a kid again.

CREATING YOUR PLAY AREA

DESIGN

You have a dream and vision! Our team of talented Playcraft Consultants and expert designers will work collaboratively with you and your team. We can assist with important factors like site evaluations, age-appropriate activities, design ideas, colors, time lines, and budgets. We'll also advise you on important safety and compliance guidelines. Utilizing our state-of-the-art PlayDesigner™ software, we work with your ideas to create unbelievable play areas filled with fun and wonder. Every shape, dream, and smile that you envisioned will appear before your eyes.

ORDERING

Ordering a playground has never been easier! When you order your playground, PlayDesigner organizes it into a detailed list of parts and enters it into our advanced electronic production and inventory control system, ensuring consistent high quality and on time delivery. Our manufacturing process uses the latest technology to create precision parts and components including climbers, decks, and rotationally molded plastic components like slides and roofs. To achieve faster turn-around times and maintain the product quality standards that Playcraft offers, virtually all of our products are manufactured in-house.

FABRICATION

All of our steel components are manufactured from electro-galvanized steel and carefully cut to exact specifications. Robotic cutters and welders augment our production team who produce the smoothest welds and metal finishes in the industry. Our metal components are then hand-cleaned, phosphate washed, and sealed thoroughly in a multi-stage bath before being sent to coating.

COATINGS

Our industry leading coatings provide exceptional corrosion resistance and long-lasting color to extend the life of your playground. After receiving a multi-stage phosphate bath, our components are sealed with a primer coat over the entire component, not just the welds. We then apply 2 coats of durable polyester TGIC powder coating to an average thickness of 11 mils, the thickest in the industry. The result is a flawless, beautiful finish unmatched by our competitors.

PLASTICS

Our team of designers and engineers utilize advanced technology and materials to create exceptional plastic products. Offering both rotationally molded and HDPE (high density polyethylene), Playcraft ensures our plastic products are manufactured with extra thick walls and colorfast materials providing superior UV stability and long lasting vibrance.

HAND FINISHING

Welds and connections are critical to the safety and longevity of your playground. Each Playcraft weld is inspected for quality and proceeds to our Finishing Team where every connection is mechanically filed and hand finished before the component receives its finish coating. You won't find a better, more consistent weld connection in the playground industry. We also round the edges on all our plastic products providing safe, comfortable play opportunities.

SHIPPING AND INSTALL

Each new playground arrives in our custom packaging and shipping materials. Every shipment comes with a comprehensive install instruction booklet along with a Playground Equipment Manual specific to your project. Our King Clamp System is unlike any other mounting system on the market, and specifically designed to ensure a smooth and stress-free installation. Playcraft has authorized install teams worldwide to handle your entire project's installation, from unloading your equipment delivery through putting the finishing touches on your dream playground to make it a reality for your community.

MAINTENANCE

Careful maintenance keeps your new playground in premium condition. Your local Playcraft consultant will work with you to create a custom maintenance plan allowing you to protect your investment, manage risk, improve children's play experiences, and control costs. We also provide a maintenance kit which includes graffiti remover and touch-up paint to keep your playground looking great for many years to come.

INCLUSIVE DESIGN

FOUNDATIONS OF INCLUSIVE PLAY

Inclusive design is a way of creating physical spaces and products to ensure everyone feels included and can play to the greatest extent possible. It introduces flexibility, choice, and accommodating features to the world that we all inhabit. Every child has the right to play, but not every child has the opportunity to do so in their local park or school. An inclusive playground eliminates barriers, encouraging personal growth along with the creation of new friendships. At Playcraft Systems, we firmly follow our belief that everyone deserves the opportunity to play, as the element of play strengthens the bond of a community.

DESIGNING INCLUSION

Inclusive play begins with an understanding of each project goal. Our network of consultants and design team will collaboratively work with your playground committee to ensure every aspect and goal is achieved. We create play areas without separation and play experiences without borders while incorporating the existing opportunities of the available space and setting. Ultimately, our design will create an environment to accommodate individual abilities yet provide an atmosphere where all children and adults can be themselves and join in the total enjoyment experienced throughout your playground.

INCLUSIVE STRATEGIES

CREATE ACCESS

Getting people to the play space is only part of the equation, ensuring they have equitable play experiences when they arrive is key to success. Consider using ramps, and providing equitable ground level play opportunities to elements that may not be accessed by a ramp so everyone can enjoy rich and diverse play opportunities.

KEEP IT SIMPLE

Understanding how to use the play area should be intuitive and easy for all people.

ADD SENSORY ELEMENTS

Think about touch, sight, sound, movement and other sensory elements when considering the mix of components to use.

ENCOURAGE SOCIAL EXCHANGES

Children learn about each other when they communicate. Consider ways to add communicative elements in the play space to help encourage exchanges and adventures between children of all abilities.

PROMOTE CHOICES

Thinking about the many ways children play is an important aspect of success. Some children love to jump in the middle of the action, others may prefer to comfortably observe from a cozy spot to bench before jumping into the play.

OPPORTUNITY FOR ALL

A child deserves to be able to interact with the other kids on the playground and not be limited to certain types of equipment based on their abilities. Provide opportunities for mixed interactions, and give everyone the opportunity to be the hero.

ACCESS POINTS

Products such as ramps, transfer stations, and handles assist children in accessing play events and transferring from mobility devices without creating obstacles or user conflict.

SWINGING

Our Inclusive Swing Seat features molded seats, high back, adjustable harness, and a neutral body position. Our Disc Swing allows multiple users and/or care givers to have fun and develop whole body awareness.

COZY SPOTS

Offering quiet or semi-enclosed places such as seats under decks, crawl tubes, or our SpinMAX Pod provide areas where children can seek sensory relief and retreat until they're ready to engage in play.

INCLUSIVE PRODUCTS

Playcraft Systems offers a wide assortment of inclusive play activities. With the help of our playground consultants and design team, your project can address the diverse developmental needs of children within your community, providing opportunities for physical, social-emotional, sensory, cognitive, and communicative development.

SENSORY ACTIVITIES

The sensory rich experiences available with our Sand and Water Tables or our Panel Pals allow children to have multi-sensory experiences through tactile, auditory, visual, and movement while also experimenting with cause and effect.

MOTION ACTIVITIES

Our Inclusive Merry-Go-Round offers dynamic physical and social engagement while featuring 12 seats and many ways to spin. Our Trans-Glide offers rocking social play and accommodates mobility devices.

SOCIAL ACTIVITIES

Encouraging cooperation, our multi-player games and thematic activities create social dialogue through fantasy play. Our inclusive play panels keep the fun going by offering a large variety of play opportunities.

FEATURED PLAYGROUNDS

Offering the widest variety of thoughtful and innovative designs.

A playground is a social space that provides a wide variety of developmental opportunities for children. Our consultants work with you to help you design for all children in ways that respect and honor everyone's abilities while offering fun and exciting new challenges.

THEME PLAYGROUNDS

A well-designed Theme provides added play value by incorporating a child's already active imagination.

In a world of “one-size-fits-all,” Playcraft Systems stands out as a company that is willing to go the extra mile to help you make your playground unique. When a fully themed playground just won't work for your project, we recommend creating a themed area or “module.” By grouping themed components together, kids can enjoy the imaginative play possibilities, while you enjoy your one-of-a-kind playground. Can't decide which theme is right for you? Since our theme components are modular, connecting multiple themes together is a breeze. Kids can experience a pirate voyage, a castle siege, or a tree house adventure all on the same structure.

Castle Theme

Treehouse Theme

Rocket Theme

Western Stagecoach Trans-Glide

THEME IDEAS

PIRATE QUEST

There is a lot to explore and adventure to be had when our castle themed equipment meets a pirate ship. Kids can stretch their imaginations with an epic pirate battle, or a lost treasure hunt that spans sand to sea, across a modularly designed intermixable themed playscape.

THEME IDEAS

CITY HEROES

Children can experience the thrill of role playing as a fireman, a military hero, or just working together to operate their city! City, Fire, and Aviation themed equipment meet in as many combinations as your imagination and our designers can create.

THEME IDEAS

CRITTER COUNTRY

In a bustling frontier town, excitement is around every corner. Climb a cactus or slide down the coal chute to catch the train. We've combined western adventure equipment with homesteaded living to give a wagon-load of play opportunities.

ROUND-5™ PLAY SYSTEMS

Our premier line features traditional post and deck construction, enhanced by modern components and our unique King-Clamp™ fastening system. This revolutionary system allows designers to attach up to 6 components per clamp for unmatched flexibility, clean designs and money saving construction.

ROUND-3.5™ PLAY SYSTEMS

These systems feature many of the same quality components found in our popular Round-5 designs, reduced in size for smaller sites and budgets. In addition, many of the components, from panels to barriers, are made from HDPE sheet plastic, ideal for design flexibility and customization.

NFUSE™ PLAY SYSTEMS

The NFUSE line strikes the perfect balance of innovative design and functional play spaces, creating an invigorating playscape every time. Challenging cables, elevated climbers and social hangout spots are ideal for ages 5-12. Connect interchangeable bays and extensions, or link between play systems to infuse new play opportunities. Modules, freestanding and hybrid structures can be tailored to fit any playground footprint and budget.

REVOLUTION™ PLAY SYSTEMS

Offering contemporary styling with a blend of modern and traditional play components, these systems are ideal for customers seeking unique, cutting-edge playground designs. From climbing to swaying, balancing to sliding, our wide selection of components is sure to delight. Many components are specifically designed to challenge the user, build coordination, and exercise the body.

ROUND-5™ PLAY SYSTEMS

Round-5™ Features:

- Advanced King-Clamp™ mounting and clamping system (patented), utilizing super-strong, precision die-cast aluminum components, allowing for the attachment of multiple components per collar and helping to reduce or eliminate clamp stacking.
- Large, heavy-duty, perforated metal decks with an extra thick, slip-resistant and cushioning Play-Tuff™ coating.
- Extra-thick powder-coatings (applied in two coats) between 11-16 mils in thickness for unmatched durability and luster.
- Huge and continually growing selection of unique and age-appropriate play events.
- 5" diameter powder-coated posts with our exclusive, factory installed self-sealing precision die-cast aluminum post cap.
- Hot-blended color compounded plastic resins for all roto-molded plastic components providing greater strength, superior color fastness and UV resistance.
- Easily expandable, fully-modular designs.
- Backed by our Industry Leading Warranty (see page 201).

With the most variety of equipment, our premier line is well suited for school age children's varied abilities.

These innovative systems are learning spaces for their growing social and physical skills. Offering engaging and inclusive designs with high play value, our Round-5 Play Systems always keep safety in mind.

MODULAR FREESTANDING

Round out your playspace with modular freestanding activity centers that can be tailored to any desired style of play or unique area. Choose from a wide and growing selection of pre-designed freestanding modules. Customize, combine, or re-design them from the ground up to fit your needs.

Our experienced playground consultants and designers can create dynamic freestanding challenges, slides, overhead traverses, sensory areas, and all kinds of themed activities. Need a kiddie clubhouse for the 2-5 age crowd, or a rocket themed climber to go with your spaceship? We can make that.

FREESTANDING GAS STATION

Featuring gas pumps and driver panels, levers, switches, and steering wheels. There is a lot to explore with this playfully themed freestanding module.

FREESTANDING ACTIVITY PANELS

A panel corral is a great way of adding imaginative and sensory play to your space. Serving as an inclusive ground level activity, these freestanding panels can be located anywhere.

FREESTANDING NFUSE ACTIVITIES

Our unique NFUSE modular freestanding play events are designed to create memorable climbing and traversing experiences. Fuse them together or to a larger structure for added variety.

FREESTANDING REVOLUTION ACTIVITIES

Revolution freestanding events are modernly styled and designed to encourage physical activity. With a wide variety of components to choose from, a dynamic and engaging freestanding module could be just the thing to add excitement to your play space.

FREESTANDING ROUND-5 & ROUND-3.5 ACTIVITIES

Our extensive Round-5 & Round-3.5 component selection offers an unmatched opportunity to create a custom piece to fit your objectives. Some of our most popular events are freestanding slides, overhead traverses, and panel corrals.

FREESTANDING THEMED ACTIVITIES

Themed freestanding events offer the freedom to add customized fantasy experiences to your playground. When a fully themed play structure may be out of your budget, a signature attraction can take your play space to the next level.

SWINGS

Swings are not only great fun, they also help children develop physically and socially. From an early age, children enjoy the sensation of movement, the feeling of the wind on their faces, and the exhilaration of swinging to their heart's content.

Borderscape™ | Access Ramp Package

1205-2 Access Ramp Package

Size: 4'4" x 5' x 1' (1.3m x 1.5m x 0.3m)

PLAYCRAFT SURFACING

A cushioning ground cover such as rubber, or engineered wood fiber, should be maintained under and around all playground equipment to reduce the impact of accidental falls. Never install playground equipment over concrete, asphalt, compacted earth or other hard surfaces. Refer to the ASTM F1292-09 guidelines for impact attenuation of surface materials.

Engineered Wood Fiber

Made from engineered wood fiber and adds a natural look to your playground.

Playcraft Turf

Has the look of real grass but does not require mowing. Also adds a natural look to your playground.

Recycled Poured Rubber

Provides an attractive, seamless, and resilient surface with great impact attenuation and ADA accessibility.

Rubber Tile

Offers great shock absorption, low maintenance, long wear, and excellent accessibility.

Recycled Bonded Rubber

An attractive tile surface consisting of shredded recycled rubber tires, polyurethane binder and pigment.

Recycled Shredded Rubber

A loose-fill surface option made of 100% clean, ground, recycled rubber tires. Available in a variety of colors.

COMPONENTS

On the following pages we've featured a selection from our extensive line of play system components appropriate for school age children. Please see our website or your local consultant for more options.

A. Terrace Climber

Deck Heights: 48"-96"
System: R5(shown), R3.5

B. Terrace Chain Climber (Curved)

Deck Heights: 36"-72"
System: R5(shown), R3.5

C. Track Climber

Deck Heights: 36"-60"
System: R5(shown), R3.5

D. Waddle Climber

Deck Heights: 48"-72"
System: R5(shown), R3.5, RV5

E. Wave Climber

Deck Heights: 60"-72"
System: R5(shown), R3.5

F. Arch Twist Climber

Deck Heights: 60"-96"
System: R5(shown), R3.5

G. Banister Climber

Deck Heights: 36"-72"
System: R5(shown), R3.5

H. Clover Climber

Deck Heights: 36"-72"
System: R5(shown), R3.5

I. Cross Loop Climber

Deck Heights: 36"-96"
System: R5(shown), R3.5

J. Curved Rung Ladder Climber

Deck Heights: 36"-96"
System: R5(shown), R3.5

K. Disc Climber

Deck Heights: <72"
System: R5(shown), R3.5

CLIMBERS | COMPONENTS

A. Disc Pole Climber

Deck Heights: 36"-84"
System: R5(shown), R3.5

B. Fire Pole Climber

Deck Heights: 36"-96"
System: R5(shown), R3.5

C. Ladder Climber

Deck Heights: 36"-72"
System: R5(shown), R3.5

D. Side Climber

Deck Heights: 48"-72"
System: R5(shown), R3.5

E. Snake Climber

Deck Heights: 36"-84"
System: R5(shown), R3.5

F. Snake Climber (Curved)

Deck Heights: 36"-84"
System: R5(shown), R3.5

G. Spiral Climber

Deck Heights: 24"-96"
System: R5(shown), R3.5

H. Spiral Step Climber

Deck Heights: 24"-96"
System: R5(shown), R3.5

I. Stacked Loop Climber

Deck Heights: 36"-72"
System: R5(only)

J. Sunrise Climber

Deck Heights: 60"
System: R5(only)

Deck Features and Highlights

- One-piece, perforated metal decks designed to fit securely to posts.
- Small deck holes help to prevent entanglement of small fingers and toes, and provide comfortable access for wheelchairs.
- Extensive matrix of doubled-up gussets.
- Exclusive deck slot for flush-mount component attachment.
- Play-Tuff™ extra-thick textured coating for durability and extra traction.

DECKS | COMPONENTS

- A. Square Deck
- B. Half Deck
- C. Tri-Deck
- D. Half Hex Deck (4 or 5 Post)
- E. 90° Curved Deck
- F. Curved Deck
- G. Balcony Deck
- H. Long Deck (Ramp Deck)
- I. Promenade Deck
- J. Step Deck

INDUSTRY LEADING WARRANTY

Every product we manufacture is designed with quality, safety and value in mind. Every project we undertake is an opportunity to prove that Playcraft Systems is setting a new standard and raising the bar on quality and play expectations... one playground at a time.

Playcraft Systems® warrants its products to be free from defects in materials and workmanship, when properly used, serviced and installed in accordance with published specifications, for a period of one (1) year from the original date of invoice. Playcraft Systems® further warrants as follows:

LIFETIME LIMITED WARRANTY

on all stainless steel hardware, metal posts, aluminum posts, aluminum caps and aluminum clamps against structural failure due to natural deterioration or corrosion, or defects in materials or workmanship.

TWENTY-FIVE (25) YEAR LIMITED WARRANTY

on all cast aluminum Spring Rider castings against structural failure due to defects in materials or workmanship.

FIFTEEN (15) YEAR LIMITED WARRANTY

on all metal rails, metal slides, handles, rungs, loops and walls, all Play-Tuff™ coated perforated steel decks, steps, and bridges, all rotationally molded and HDPE sheet plastic components, excluding recycled plastic components, against structural failure due to defects in materials or workmanship.

All warranties above commence on the date of the original invoice from Playcraft Systems®. For the purpose of this warranty, the term LIFETIME encompasses no specific number of years, but rather that Playcraft Systems® warrants to its original customer, for as long as the original customer owns the Products and uses the Products for their intended purpose, that any Products and all components will be free from defects in materials and workmanship. The warranty stated above is valid only if the products and finishes: (1) are assembled and installed in conformity with the layout plan and installation instructions furnished by Playcraft Systems®; (2) have been maintained and inspected in accordance with Playcraft Systems® maintenance information and other normal and prudent practices; (3) have been subjected to normal use for the purpose for which the products were designed and intended; (4) have not been subjected to misuse, abuse, vandalism, accident or neglect; (5) have not been altered in any manner including, but not limited to, incorporating unauthorized or unapproved parts; and (6) have not been modified, altered, or repaired by persons other than Seller's designees in any respect which, in the judgment of Seller, affects the condition or operation of the equipment. This warranty does not cover: (1) cosmetic damages or defects resulting from scratches, dents, marring, rough handling, improper installation methods, fading, discoloring or weathering; (2) damage due to extreme or prolonged exposure to "Environmental Factors", such as wind-blown sand, salt water, salt spray and airborne emissions from industrial sources (sulfur, acids, chemicals, or corrosive agents, other than normal photochemical smog); (3) damage caused by environmental hazards and "Acts of God", such as hail, flooding, lightning, tornadoes, sandstorms, earthquakes, windstorms, and other extreme weather conditions; or (4) normal wear and tear. No warranty is made with regard to gloss retention or uniformity of gloss and color retention. If any products covered by this warranty fail within the time period applicable to a defective product, Playcraft Systems® shall, upon being notified of the defect in writing, at its sole option, either repair the defective products or replace the defective products within 60 days of receipt of the written notification. Repair or

TEN (10) YEAR LIMITED WARRANTY

on all shade canopy fabric made of UV Stabilized HDPE monofilament yarn and tape against significant fading.

TEN (10) YEAR LIMITED WARRANTY

on all Play-Cord and Net Effects cables and connectors against breakage and failure due to defects in materials or workmanship.

FIVE (5) YEAR LIMITED WARRANTY

on all Playcraft System® powder coating against cracking and/or peeling due to normal climatic exposure.

THREE (3) YEAR LIMITED WARRANTY

on all Net Effects rubber belting, springs, moving swing parts, as well as all recycled plastic components against failure due to defects in materials or workmanship.

ONE (1) YEAR LIMITED WARRANTY

on any other product or part not specifically covered above against failure due to defects in materials and workmanship.

replacement as provided in this section shall be the purchaser's exclusive remedy and purchaser expressly agrees that Playcraft Systems® shall not be responsible for any other damages, losses, or costs, including consequential and incidental damages, claimed by purchaser. Playcraft Systems® shall deliver the repaired or replacement products to the purchaser free of charge, but shall not provide labor, reimbursements for labor or reimburse any other costs associated with the removal or disposal of the defective products and/or the installation of any replacement products. Notwithstanding the previous sentence, Playcraft Systems® shall not pay for any costs of shipping replacement parts outside of the continental United States. Any products replaced or repaired consistent with this paragraph shall be guaranteed for the balance of the original warranty period. THIS WARRANTY IS EXCLUSIVE AND IS IN LIEU OF ALL OTHER WARRANTIES, WHETHER EXPRESSED OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THE REMEDIES PROVIDED HEREIN SHALL BE THE EXCLUSIVE AND SOLE REMEDIES OF THE ORIGINAL PURCHASER. PLAYCRAFT SYSTEMS® IS NOT LIABLE FOR ANY SPECIAL, DIRECT, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES WHICH MAY ARISE FROM THE PURCHASE, USE OR MISUSE OF ITS PRODUCTS. SOME STATES DO NOT ALLOW THE EXCLUSION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION MAY NOT APPLY. PLAYCRAFT SYSTEMS® NEITHER ASSUMES NOR AUTHORIZES ANY OTHER PERSON TO ASSUME OR IMPLY ANY OTHER LIABILITY IN CONNECTION WITH THE SALE OR USE OF THE EQUIPMENT SOLD. To make a claim under the terms of this warranty, purchaser must submit a written statement detailing the nature of the warranty claim, including an itemization of each defective condition, along with a copy of the original invoice, maintenance records and supporting photographs to Playcraft Systems®, 123 North Valley Drive, Grants Pass, Oregon 97526. Due to our ongoing commitment to product development and Improvement, Playcraft Systems® reserves the right to change, modify or discontinue certain products without notice. (Rev. P)

Every product we manufacture is designed with safety, quality and value in mind

Our highly experienced engineering team continually develops new products while refining existing ones with the latest materials and CAD/CAM - computer-aided drafting and manufacturing technology. After design and fabrication, each new product is tested for conformance with safety and performance standards for public playground equipment by the American Society of Testing Materials International (ASTM F1487) and the U.S. Consumer Product Safety Commission (USCPSC).

All of our products meet or exceed the design and safety guidelines found in the ASTM F1487 and USCPSC publications for playground equipment designed for public use.

We also offer a wide range of accessible equipment designed to meet the latest guidelines developed by the Federal Access Board. For detailed information on these guidelines, please feel free to contact us at 1-800-333-8519. You can also contact the U.S. Architectural and Transportation Barriers Compliance Board at 1-800-872-2253 or visit them online at www.access-board.gov

Playcraft Systems® is a member of the International Play Equipment Manufacturers Association (IPEMA), a member-driven organization whose mission is to assist in providing safe environments for children's play. In the interest of playground safety, IPEMA provides a Third Party Certification Service whereby a designated independent laboratory validates a manufacturer's certification of conformance to ASTM F1487 (excluding sections 10 and 12.6.1) Standard Consumer Safety Performance Specification for Playground Equipment for Public use and CSA-Z614 Standards. The use of the IPEMA certification logo in the Playcraft Systems® buyer's guide signifies that Playcraft Systems® has received written validation from the independent laboratory that the products associated with the use of the logo conform with the requirements of the indicated standard (excluding Sections 10 and 12.6.1). Please understand that development of new and existing products and certification of these products is an ongoing process. For a list of our currently IPEMA CERTIFIED products, please visit the IPEMA website at www.ipema.org or visit our website at www.playcraftsystems.com

Standards and Development Organizations

The American Society of Testing & Materials International (ASTM) is one of the largest voluntary standards development organizations in the world, a trusted source for technical standards for materials, products, systems, and services.

Known for their high technical quality and market relevancy, ASTM standards have an important role in the information infrastructure that guides design, manufacturing

and trade in the global economy. In 1993, ASTM published Standard Consumer Safety Performance Specifications for Playground Equipment for Public Use, designated as F1487-93. The standard was reprinted in 1995 and 1998 and revised in 2001, 2005, 2007, 2011 and 2017 with the new designation F1487-17. The ASTM establishes minimum acceptable performance specifications for everything from access components to surfacing.

The United States Consumer Product Safety Commission (USCPSC) is charged with protecting the public from unreasonable risks of serious injury or death from more than 15,000 types of consumer products under the agency's jurisdiction. The USCPSC is committed to protecting consumers and families from products that pose a fire, electrical, chemical, or mechanical hazard or can injure children. The USCPSC's work to ensure the safety of consumer products - such as playground equipment - contributed significantly to the decline in the rate of deaths and injuries associated with consumer products over the past 30 years. The USCPSC's Handbook for Public Playground Safety is a key reference tool for the playground industry, including specifications for the use of playground equipment and recommendations concerning age-related designs and play components.

CSA International is a Nationally Recognized Testing Laboratory (NRTL) accredited by OSHA and ANSI in the United States and by SCC in Canada. CSA International tests and certifies products following standardized test protocols in laboratories across North America. As a solutions-oriented organization, CSA works in Canada and around the world to develop standards that address real needs, such as enhancing public safety and health, advancing the quality of life, helping to preserve the environment and facilitating trade.

TUV Product Service, an international testing and certification organization, is a European Union Notified and Competent Body providing services which include product testing and certification. The European Harmonized Standard for Commercial Playground Equipment, EN 1176, is the TUV standard for commercial playgrounds. For complete EN 1176 details, contact your Playcraft representative.

THE IMPORTANCE OF COLOR

Color is an element of visual language that people process before they are consciously aware of it. Color draws attention, sets the tone of the message, and guides the eye where it needs to go. It presents a sense of priority and direction that people can identify and relate to. Because color is such a potent element of visual communication, we need to take into

consideration how we use it and the effect it has on the viewer. We know how easy it is to simply pick your favorite colors and move forward with your playground design. But, we're here to explore a few methods and considerations that we think deserve your attention if you want to create expertly designed playgrounds.

THE COLORING PLAN

Your plan for choosing play equipment colors may be guided by a variety of factors. There are often many stakeholders in any project, and by addressing their concerns or interests a playground can be designed that serves the widest audience and fosters community support. Our dedicated consultants will treat your color plan with as much care as they take in your professional relationship with Playcraft Systems.

3 METHODS OF CHOOSING COLORS

Same Palette - Different Application

1

Coloring by OBJECTIVE

Coloring by predetermined objectives is a smart way of choosing colors for a playground. A color palette can be coordinated with the surrounding environment, a theme, or a client's established brand identity.

2

Coloring by PALETTE

Coloring by a pre-selected color palette is a common way of choosing colors for a playground. For example, school colors are often represented in their choice of playground colors. Our experienced designers can create custom palettes that harmonize with your needs.

3

Coloring by LAYOUT

Coloring by the system layout and visual weight of the actual equipment is perhaps the most open and artistic way of choosing colors for a playground. Using basic color theory, a color palette can be developed that works well with the play equipment while taking its form and function into consideration.

Powder-coat Colors

Metal components receive a multi-stage powder-coating process that yields a highly durable protective finish.

Roto-molded Plastic Colors

Using hot-blended color compounded resins our roto-molded products stay bright and colorful even after years of wear.

HDPE Sheet Plastic Colors

Our high density polyethylene sheet plastic is available in solid and layered colors for a variety of design opportunities.

Play-Tuff™ Coating Colors

Our in-house state-of-the-art Play-Tuff™ (plastisol) coating process offers unmatched protection on decks & steps.

Thermoplastic Coating Colors

Our Thermoplastic Polyethylene coating is an environmentally responsible choice.

Shade Canopy Fabric Colors

Our ultra-tough fabrics come in a wide variety of colors and provide superior protection from harmful ultra-violet rays.

Play-Cord™ Cable Colors

Cables are made from tightly woven, abrasion-resistant, nylon-wrapped, multi-strand galvanized steel cable.

Swing Seat Colors

Slash Proof Seats are constructed from durable elastomer and come in a variety of colors.

2021 PLAYCRAFT COLOR CHART

METALUXE™ Signature Powder-coat Colors

Our exclusive collection of metallic powder-coat colors provide a finish that speaks to luxury and brilliance. These highly durable, grime resistant coatings bring a touch of shimmer to your playscape.
